

EXCLUSIVE DISTRIBUTOR OF **CURO** DIAGNOSTICS

Watch AMT's latest Interview now on the Equus Tv Network and at [myographytech.com](http://myographytech.com) to learn more about the **New CURO Mk II**

Listen to Dr. Morton describe the many uses of the **CURO Mk II** for Veterinarians at [myographytech.com](http://myographytech.com)

The all NEW and IMPROVED **ESTi™ by CURO Mk II**, a wireless and completely portable diagnostic technology that uses very sensitive sensors to measure the pressure waves that skeletal muscles generate when they are active, will be demonstrated by appointment **"live and in person"** by Advanced Myographic Technologies, the Exclusive Distributor of CURO Diagnostics, ApS. The **AMT Executive Staff** will demonstrate this unique and innovative technology, the **ESTi™ by CURO Mk II**, by signing up via AMT's website, but only a select few will have the opportunity to hold it, try it, and be one of the first to purchase it at a **Discounted Introductory Price** during this Exclusive Pre-Sale Release. Consider this your Private Invitation to a once in a lifetime opportunity.

**SPECIAL INTRODUCTORY PRICE OFFER FOR A LIMITED TIME ONLY!**

**\* The word CURO means "I CARE" and was chosen as a name for this technology since it allows us to care for the way we train and rehabilitate humans, horses and dogs.**

### WHAT CAN THE CURO BE USED FOR?

- Tracking Muscle Development
- Tracking Muscle and Tissue Injury Evaluation
- Tracking Muscle Performance
- Tracking Muscle Efficiency
- Physical Therapy
- Pre-purchase Exams
- Orthopedic Evaluations (Pre and Post Op)
- Assisting in Neurological Evaluations

The all NEW and IMPROVED **ESTi™ by CURO Mk II** is the latest, updated and most innovative wireless version of the CURO Myographic diagnostic technology that exists today, thanks to Dr. Adrian Harrison, Ph.D. of CURO Diagnostics, ApS who discovered this ground breaking invention a few years ago. For the first time in modern medical history we have the ability to measure, diagnose and even avoid injuries BEFORE they happen. The wireless **ESTi™ by CURO Mk II** uses soundwave technology to "Reveal the Unseen" by revealing the level of coordination, spatial-and temporal-summation of active muscles thereby revealing injuries, early signs of determining all muscle groups imbalance, their progression, and treatment improvements in REAL TIME in both humans and animals. You can learn all about at AMT's website [www.myographytech.com](http://www.myographytech.com).

\*For licensed veterinarians, medical doctors, healthcare techs, sports medicine & athletic trainers!
