Taking Acoustic Myography to a Higher Power™

SPECIAL INTRODUCTORY PRICE OFFER FOR A LIMITED TIME ONLY!

*** The word **SOFi™** was chosen as a name for this technology since it allows us to care for the way we train and rehabilitate humans, horses and dogs.**

WHAT CAN THE **SOFi™** BE USED FOR?

- Tracking Muscle Development
- Tracking Muscle and Tissue Injury Evaluation
- Tracking Muscle Performance
- Tracking Muscle Efficiency
- Physical Therapy
- Pre-purchase Exams
- Orthopedic Evaluations (Pre and Post Op)
- Assisting in Neurological Evaluations
- All of Sports Medicine

The all NEW and IMPROVED **SOFi M²™** by **SOFi™** is the latest, updated and most innovative wireless version of the **SOFi™** Myographic diagnostic technology that exists today, thanks to Dr. Adrian Harrison, Ph.D. of SENTIO sHOLDINGS, Aps who discovered this ground breaking invention a few years ago. For the first time in modern medical history we have the ability to measure, diagnose and even avoid injuries BEFORE they happen. The wireless **SOFi M²™** by **SOFi™** uses soundwave technology to "Reveal the Unseen" by revealing the level of coordination, spatial-and temporal-summation of active muscles thereby revealing injuries, early signs of determining all muscle groups imbalance, their progression, and treatment improvements in REAL TIME in both humans and animals. You can learn all about at AMT's website www.myographytech.com.

*For licensed veterinarians, medical doctors, technicians, sports medicine & professional trainers!
