

Revealing...the Unseen

Discoveries that can help us better understand how to take care of ourselves and our animals doesn't come around very often.
That discovery is now here!

The all NEW and IMPROVED **SOFi M2™** by **SOFi™**, a wireless and completely portable diagnostic technology that uses very sensitive sensors to measure the pressure waves that skeletal muscles generate when they are active, will be demonstrated by appointment "live and in person" by Advanced Myographic Technologies, the Manufacturer and Distributor Advanced Myographic Technologies. The **AMT Executive Staff** will demonstrate this unique and innovative technology, the **SOFi M2™** by **SOFi™**, by signing up via AMT's website, but only a select few will have the opportunity to hold it, try it, and be one of the first to purchase it at a **Discounted Introductory Price** during this Exclusive Pre-sale Release. Consider this your Private Invitation to a once in a lifetime opportunity.

www.myographytech.com

WHAT CAN THE **SOFi M2** BE USED FOR?

purchase the **SOFi™ by SOFi M2™** at a
Special Discount Price

The all NEW and IMPROVED **SOFi™ by SOFi M2™** is the latest, updated and most innovative wireless version of the CURO Myographic diagnostic technology that exists today, thanks to Dr. Adrian Harrison, Ph.D. of SENTIO Holdings, LLC who discovered this ground breaking invention a few years ago. For the first time in modern medical history we have the ability to measure, diagnose and even avoid injuries BEFORE they happen. The wireless **SOFi™ by SOFi M2™** uses sound-wave technology to "Reveal the Unseen" by revealing the level of coordination, spatial and temporal-summation of active muscles thereby revealing injuries, early signs of determining all muscle groups imbalance, their progression, and treatment improvements in REAL-TIME in both humans and animals. You can learn all about at AMT's website www.myographytech.com.
